

Student comments- PAR 345: Philosophy of Science (Spring 2020)

Complete, unedited student comments for the course:

-Dr. Smithson is awesome. He is one of my favorite professors I have ever had. He is so good at explaining everything we did in this class. He also was willing to help anyone at anytime. He is so funny and makes this class super interesting and fun. Even though online learning is not ideal, he makes even learning online a great experience.

-I've said this before and I'll say it again: you're basically John Mulaney. Seriously, check out his stand-up.

-Great professor! Very approachable. Kept the material interesting. My only complaint is that we had to switch to online. I think I would have gotten at least a B or an A in this class had the current circumstances not happened, but obviously that is out of everyone's control. Unfortunately I struggle greatly with online learning. I appreciate all of the hard work on the professors end, especially Dr. Smithson's, and I hope to take another one of his courses during my time at UNCW.

-Great guy, his office hours really helped me.
