

## Student comments- PAR 110: Intro to Logic (Fall 2018)

-Dr. Smithson is an excellent professor who demonstrated concern for his students understanding of the material and enthusiasm for the subject of logic. I would definitely recommend him for anyone who is interested in taking a logic course.

-Great enthusiasm with tough topic at hand! Thanks for making class a fun space!

-I enjoyed the professor and class; however, there were some moments when I struggled. Luckily Professor Smithson was helpful and available all the time.

-Greatly appreciate all the help you give students to allow us to succeed in class.

-Thank you for always bringing energy to class, and being a resource to us instead of just treating us as students on your roster.

-Overall an interesting course, and Hurricane Florence was handled well. Something helpful would've been to go over some homework questions in class; asking which ones were the hardest and walking through them.

-Dr. Smithson is the best learning instructor I have had thus far. His teaching is easy to follow and he keeps his lessons interesting. He keeps the course challenging but not impossible unlike some other professors. His priority is making sure his students learn the material.

Overall a great dude
